

Introduction

M/s. Gas Projects (I) Pvt. Ltd.'s Compressor Skid are factory assembled Compressor and Motors constructed as a Compressor Skid for compressing solution. The Skid is designed and manufactured to ease of installation and operation.

Compressor Skid is designed to standard unloading requirements and customer built requirements which suits industrial requirements.

Compressor Skids can be used for transfer operations and gas evacuation operations.

Features

- Ease of installation
- Dynamically balance and tested
- Standardised Hardware
- Minimal Maintenance

Key Features of Compressor

- Designed for continuous duty
- Deep finned cast iron cylinders
- Aluminium cooler tubes and aerodynamically designed fan for efficient cooling
- Knockout drum conforming to ASME design
- Sturdy, robust case iron crankcase
- Forged steel crankshaft
- Optimal operating speed
- Pressure relief valve for extra safety
- Low expansion aluminium alloy piston

COMPRESSOR SKID

ELEVATION OF COMPRESSOR

SERVICE	COMPRESSOR MODEL	MOTOR CAPACITY IN HP	FLOW RATE (M ³ / HR)	DISPLACEMENT AT 400 RPM (CFM)	SHIPPING WEIGHT IN KG.
